

Amanda Hennegar

Special Projects Coordinator

Education for Employment System #330

What I do for 6-8th graders in the Champaign-Urbana area:

1. We utilize Career Cruising, a database that matches students with careers based on their interest and allow them to research their career goals, to educate students on careers early on.
2. We host the annual 8th grade career conference based on Career Cruising results, where the students get to learn about jobs in their career choice.
3. We host workshops for teachers and principals from schools in Champaign-Urbana in order to better educate their students.
4. We serve on local committees that work to improve 6-8th grade student's education and future career choices.
5. We educate students on the Early College and Career Academy (ECCA) program early on to help them set goals and plan for their high school experience.
